

**CASINO ACOUSTIC PROJECT**  
**OCEAN POINT COLONY TRUST**

**7/4/2023**

“We are a nonprofit organization dedicated to responsible stewardship of properties and resources and to creating programs and activities at Ocean Point, Maine, for the enjoyment of all.”

After input from the Ocean Point community and reviewing the recommendations from members of the Acoustics Committee the OPCT Board voted to proceed with a project to improve the acoustical environment within the Casino. Acoustical treatment was a component of the original Casino design and budget but was deferred at the time for more pressing budgetary reasons. The OPCT Board voted to fund the project up to \$35,000 with \$15,000 from existing OPCT funds and \$20,000 from community fund raising.

Representing OPCT contributors as well as the greater Ocean Point community I am leading **the challenge to raise the needed community funding by the Annual Meeting August 19**. While this seems to be a formidable task I believe that collectively with the willing personal contributions of many I believe that our goal can be reached. The Casino facility and grounds have had noticeably increased use by the greater community over the past several years. Improving the acoustics of the building will allow for even more enhanced utilization.

You may demonstrate your support by donating funds electronically via the website or by check made out to OPCT with a notation for application to the Acoustics Fund to myself or Barbara Klein, OPCT Treasurer. Promptness would be greatly appreciated. Our progress will be communicated. We are also considering a funding raising community event. Keep in mind that purchasing a Don Demers print contributes \$550 to the cause.

I am willing to talk with anyone about the project and design concepts. Attached is a brief overview.

Please spread the word to your neighbors who may be unaware of the project or who are not contributors to the OPCT but might be willing to support this effort.

Thanks for your support in advance.
